

Develop Train Maintain LLP

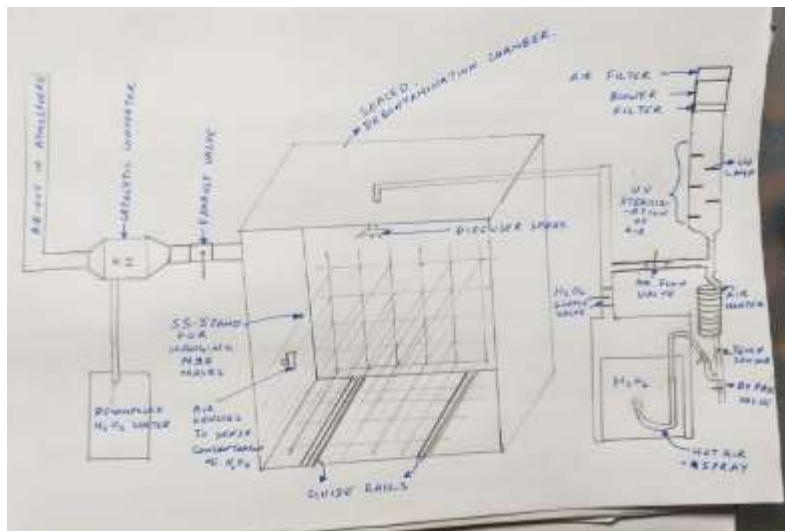

About

Develop Train Maintain is a Renewable Energy start-up focused on Hydrogen and Wind Energy. We develop pollution free products for Smart Homes (Wind Turbines) and Futuristic Smart Vehicles (Hydrogen-fuelled). We educate young and innovative minds in the field of Hydrogen and Wind Energy through seminars and hands-on workshops. Based on our years of research we provide services related to renewable energy as well as future vehicles & allied application.

Covid-19 Project

As the World in fighting COVID-19, it is quite evident that the availability of PPE (Personal Protective Equipment) isn't sufficient. Hence, the worlding is moving up towards the Reuse of PPE. The most urgent requirement and shortage is of N95 masks. These masks as per the associations can be reused after proper decontamination. This method can be used to decontaminate the mask for about 20 cycles, keeping its integrity intact.
