FountLab Solutions Pvt. Ltd

About

Using the Internet of Things (IoT), Big data and data science, FountLab harnesses the power of the cloud and packs it into smart control devices that make commercial buildings more comfortable and energy efficient. We provide a digital twin of a commercial building that embeds real-time data. A solution that delivers maintenance notifications, identifies energy-saving insights and enables data-driven capital investment decisions

Covid-19 Project

Contamination of mucous membranes of the eyes, nose and mouth is likely in a scenario of droplets generated by cough, sneeze of an infected person or aerosol generating procedures carried out in a clinical setting. Inadvertently launching the eyes/nose/mouth with the contaminated hand is another likely scenario. Hence protection of the mucous membranes of the eyes/nose/mouth by using face shields is an integral part of the standard and contact precautions.

So, protect yourself and your loved ones using this face shield. It is lightweight and provides protection from direct exposure to unhealthy surroundings. The face shields can be worn with or without glasses or goggles.
