

# Manish Gupte

---

Manish Gupte is a Founder Mechanism Analytics technical mentoring, Econometric, bio statistics, speech and image processing, data mining, neural networks and machine learning, agriculture and agri economics. Founder Mechanism Analytics Scientist doing inter-disciplinary research. Academic highly applied work & involved in many HR interventions, Econometrics.

Manish Gupte worked on Peer Appraisals for my dissertation. As a graduate student instructor, taught for three semesters (Principles of Microeconomics, Principles of Macroeconomics and Labor Economics). He also worked on a various econometric projects. He estimated how liking for a song affected the likelihood a person would rate the song.

He used Yahoo! data for this purpose. He also worked on housing demand estimation. It was found that locals pay less for housing. It was a structural model. I also worked on price elasticity estimation for a popular beverage.

This was done with SAS Institute, Chicago. He also worked on the WERS dataset for various management practices .He have taken six econometrics courses and programed various estimation methods from basics.
